Printing Guide

PAPER — matte photo paper, cardstock, or cotton fine-art paper. Frames look best with a white mat (border) around the print.

HOME PRINTER — set scale to 100% and quality to "Best".

PRINT SHOP — send the JPG from the folder matching your frame size; they will handle the rest.

SIZING — each file is named by its ratio (2x3, 3x4, 4x5, 5x7-A, square). A 4:5 file prints 8x10, 16x20 and 24x30 inches with no cropping. All designs are centered, so minor trims never cut off art.
